DONGFENG CAPTAIN E21-854

TECHNICAL SPECIFICATION

ENGINE	
Model No	E21-854
Engine Model	D28D10-3D3,(ISUZU Technology)
Engine Type	04 cylinder,TCl, Diesel engine
Piston Displacement (CC)	2771 cc
Max Power (HP/rpm)	102 HP@3600 rpm
Max Torque Output (Nm@rpm)	235Nm@1800-2000rpm
Emission Standard	EURO II
TRANSMISSION	
Transmission/Gear Box Model	5GT32
Gear position	05 forward 01 reverse
Gear box Ratio	5.595/2.848/1.691/1.000/0.794/R(5.347)
Clutch Dia (mm)	265 mm
Gradeability (%)	30%
CARGO DIMENSION	
Overall Size (LxWxH) (mm)	4938 x 1970 x 2265
Rear Cargo body size (mm)	3100 x 1880 x 400 (10ft x 6 ft x 1.31ft)
Wheel Base (mm)	2515
Ground Clearance(mm)	160
Turning radius (m)	7M
BRAKES, WHEELS & TYRES	
Brake System	Hydraulic brake
Tyre Size	6.50R16 10PR (Radial)
Number of Tyre	6+1
WEIGHTS	
GVW (Kg)	2850
Curb Weight (Kg)	1500
Payload Capacity (Kg)	1350
Seating Capacity	2+1
PERFORMANCE	
Final Drive gear ratio (FDR)	5.375
Max Speed (Km/h)	110kmph
OTHERS	
Steering	Power Steering
Battery (Volt)	12
Battery Amp.	80Ah
Fuel TankCapacity	76
Suspension (F/R)	Shock absorber
Cabin System	Single tilt type
Drive Mode	RHD
Standard Facilities	RADIO+ MP3

◆ High-quality gearbox

Adopting Isuzu technology and technique and optimizing inter-gear combination flexibility, improving service life and reducing noise.

◆ High-quality front & rear axles

Adopting Isuzu technology and technique, high-strength material and optimal design proposal to be more reliable.

◆ Brake vacuum tube

Equipped with brake vacuum tube; once engine fails to work, still assures five times' effective braking.

◆ Pre-crash seatbelts

In any emergency, seatbelt immediately tightens to firmly fix the drivers and passengers on the seats to avoid greater shock.

◆ Stabilizer bar

Equipped with anti-roll stabilizer bar to enhance the vehicle steering stability and safety.

CARS DRIVING AND SITTING

- Adopting a double cone synchronizer gearbox to conveniently select or change the gear and comfortably drive.
- Designing the distance from the accelerator pedal to the brake pedal by taking the ergonomics as the principle to make the operation more comfortable.
- Whole series standard power steering to assure more convenient steering.
- 2030mm cab external width to accommodate multiple persons with wide space.
- Adopting deep-color environmental protection interior to enable the drivers not to be easily fatigue in a long distance driving.
- Assuring the drivers and passengers to be comfortable in the long distance driving at the greatest degree due to ergonomic seat and steering wheel design.

◆ HIGH EFFICIENCY ENGINE

Latest engine with Isuzu technology, adopting German BOSCH technology electric control VE pump, optimal combustion chamber's high-strength piston from Federal-Mogul corporation and ECU computer control, combining Dong feng Nissan engine lightweight design and optimal combustion optimization technology to greatly reduce the fuel consumption.

◆ SAFE GUARANTEE

Reliable quality: passed the strict road test of 500 thousand kilometer at the Asian biggest test ground.

The first one in the industry to pass European ECE R29 cabin frontal crash test and coping test to ensure the reliable quality.

It is safer: frame rearview mirror without blind point, large-capacity air reservoir, parking break.
